Increased Security

Looking for a perfect solution for cabinets, gym lockers, mailboxes, drawers, equipment, or doors? 107432 combination cam lock with key override offers code retrievable capabilities and keyless access. Secure heavy duty combination lock has 10,000 possible combinations and master key access. Dual access lock comes with key and combination access, and high security tubular keyway. Popular use for combination cam locks is healthcare, education, gyms, schools lockers, anywhere needing flexibility of combination retrieval or multiple person access.

Easy-to-Use

Combination cam lock with key override is user friendly with easy to read dials and open and close indicators. It provides the flexibility of combination retrieval and multiple person access. Combination can be set in 3 easy steps for the dual access lock. Combination lock with key override can be installed vertically or horizontally. Cam can be placed in 180 degree or 90 degree increments (with dual whole cams). Dual access cam lock has an easy-to-use knob with no need to twist bulky housing that defaces surfaces.

Easy Installation

Combination cam lock with key override retrofits any standard $\frac{3}{4}$ " cam hole. Dual access lock is factory set to all zeros. It fits material thickness up to $\frac{3}{8}$ " and comes with combination cam lock with master key override, 1 cam (1-1/2" straight cam), cylinder nut, screw and washer, chrome finish. Dual access cam lock retrofits any standard cam lock and is perfect for locker locks, cabinets, drawers, storage, or mailboxes.
